## **DETAILED ACTION**

### **REMARKS**

Applicants' amendment dated April 24, 2007 responding to the January 24, 2007 Office Action provided in the rejection of claims 1-24, wherein claims 1 and 10 have been amended and claims 25-26 are newly added. Claims 1-26 remain pending in the application and which have been fully considered by the examiner.

The Examiner withdraws the objection to the specification for the minor informalities and to the rejection to claims 1-7 under 35 U.S.C. § 101 corresponding to Applicants' amendment.

### **CLAIM REJECTIONS - 35 USC § 112**

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim **26** recites the limitation "wherein n" in line 1. There is insufficient antecedent basis for this limitation in the claim.

### **CLAIM REJECTIONS - 35 USC § 103**

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims **1-3, 5-9, and 26** are rejected under 35 U.S.C. 103(a) as being unpatentable over “Experimental Implementation of a Quantum Game” by Carsten Schuck, July 22, 2003, hereinafter Schuck and further in view of “Multiplayer Quantum Games” by Simon C. Benjamin et al, hereinafter Benjamin.

Schuck teaches substantially all of applicants’ claimed invention of a method for allocating contributions toward a cooperative effort but fails to disclose a plurality of players in a quantum game.

Benjamin teaches multiplayer quantum games (title).

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to combine the method of Schuck with the multiplayer quantum games of Benjamin.

The motivation for doing so would be to prevent players from successfully betraying one another (Benjamin, abstract).

### **RESPONSE TO ARGUMENTS**

#### **Rejection under 35 U.S.C. §102(a)**

Applicants' arguments with respect to claims 1-3 and 5-9 have been considered but are moot in view of the new ground(s) of rejection.

### **ALLOWABLE SUBJECT MATTER**

Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: it is the combination of all limitations set forth in claims 1 and 4 and in particular, the limitation "N is equal to a product of  $n(n-1)$  and a probability p, and p is less than 1" sets forth in claim 4, which distinguishes over prior art of record.

Claims **10-25** are allowed.

The following is a statement of reasons for the indication of allowable subject matter: it is the combination of all limitations set forth in claims 10-25 and in particular, the limitation "a

plurality of stations, where each station is associated with a plurality of the channels and is capable of performing a player-selected operation on states of photons associated with the station” sets forth in claim 10 and the limitation “the stations comprise  $n$  stations; and the channels comprise  $p \cdot n(n-1)$  channels for a probability  $p$  less than 1” sets forth in claim 17, which distinguish over prior art of record.

### CONCLUSION

Applicants’ amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
